Through the Carbon Neutral Britain Climate Fund™, carbon emissions have been offset through internationally certified carbon offsetting projects.

Certified via the Verra - Verified Carbon Standard (VCS), the Gold Standard - Voluntary Emission Reductions (VER) or the United Nations - Certified Emission Reductions (CER) programmes, the projects have also been selected based on their direct and indirect impact around the world - not just in offsetting, but also in supporting education, employment and clean water, as well as having net positive impact on the local wildlife and ecology.

As the three largest, and most regulated voluntary offsetting standards used by organisations and even countries in their emissions reductions - all measurements and tonnes of CO²e offset are accurate, and verified.

Some of the recent projects supported via the portfolio have been included but to view more, please visit: <https://carbonneutralbritain.org/pages/our-projects>. Thank you for your support.
