We:

- are flexible, creative, caring and positive - helping you celebrate your loved one's life in a way that feels right for you - simple, flamboyant, eco, humanist, traditional, contemporary or alternative
- know how much you spend has nothing to do with how much you love
- are celebrants too, which means we can lead ceremonies - and help plan celebrations too
- are a carbon neutral business, working in sustainable and eco-friendly ways. We source environmentally-friendly and fair-trade coffins and urns made of natural, biodegradable, sustainable and low-carbon materials. We support local flower farms whose flowers are grown not flown, are sustainable and chemical-free
- publish all our prices on our website
- are transparent in the way we charge
- don't make any profit from 3rd party fees for things like coffins, ashes urns, funeral venue costs etc... you pay what we've paid and no more
- will give you a written estimate, confirming arrangements, timings and costs
- can come to you or you can come to us - or we can arrange everything by phone, email and post if you prefer
- can help you with choosing a special venue too if you'd like, indoors or outside - in your garden, in a field or woods, a barn - and traditional venues too
- believe that celebrating a life in simple, thoughtful ways has great meaning
